

Subject Interest Test

Your Leaving Cert subject report

Date: 25 January 2026

Strongest interest area: Business & Commerce

Recommended Leaving Cert Subjects

- 1 Business Studies (Higher Level)**
Your strongest interest area — continue developing this for CAO applications. Your H1 prediction confirms exceptional aptitude.
- 2 Economics (Higher Level)**
Your second-highest interest aligns perfectly with your numerical aptitude. Essential for finance and economics degree programmes.
- 3 Accounting (Higher Level)**
Your top interest in Business & Commerce pairs perfectly with Accounting. This subject strengthens CAO applications for business, finance, and economics degrees.
- 4 Computer Science / Technology**
Your high technical interest combined with 100% technical aptitude means you could explore this as a Leaving Cert subject or through extracurriculars.

Your Interest Areas

What Your Results Say

Aoife shows a clear and strong preference for Business & Commerce, with Economics and Technology as significant secondary interests. Her subject interest profile aligns exceptionally well with her aptitude data — her top interest areas are precisely the ones where her analytical and technical abilities are strongest. This coherence between interest and ability is a powerful indicator of future academic satisfaction and career success. Her moderate interest in Psychology and Creative Arts reflects the Social and Artistic dimensions of

her Holland Code, suggesting she may gravitate toward business roles that involve people interaction and creative problem-solving rather than purely quantitative positions.

Worth Exploring Next

Digital Marketing

Data Analytics

Entrepreneurship Workshops

Financial Literacy

UX Design

Behavioural Economics

How to Use This Report

- Bring this report to your subject choice meeting with your guidance counsellor and parents.
- Check the entry requirements of courses you like on cao.ie before you finalise your subjects.
- Keep a balance: choose subjects you enjoy, that suit your strengths, and that keep options open.
